About

Who I am and what I work with

Professional Summary

CAD Designer working in SolidWorks, AutoCAD and Revit. I prepare production, assembly and part drawings with GD&T, BOMs and revision control, and I have prepared 500+ drawings so far. I model parts and assemblies to check fit before release, and I also draft kitchen and MEP layouts. I have trained students in AutoCAD, and I hold a Diploma in Mechanical Engineering.

CAD Software

- AutoCAD
- SolidWorks
- Revit / BIM

Design & Drafting

- 3D part and assembly modeling
- 2D production drawings
- Sheet metal drawings
- Reverse engineering

Standards & Documentation

- GD&T (flatness, parallelism, position)
- ISO drafting standards
- BOM preparation
- Revision control

Contents

A 3D Modeling, SolidWorks — Pages 3 - 4

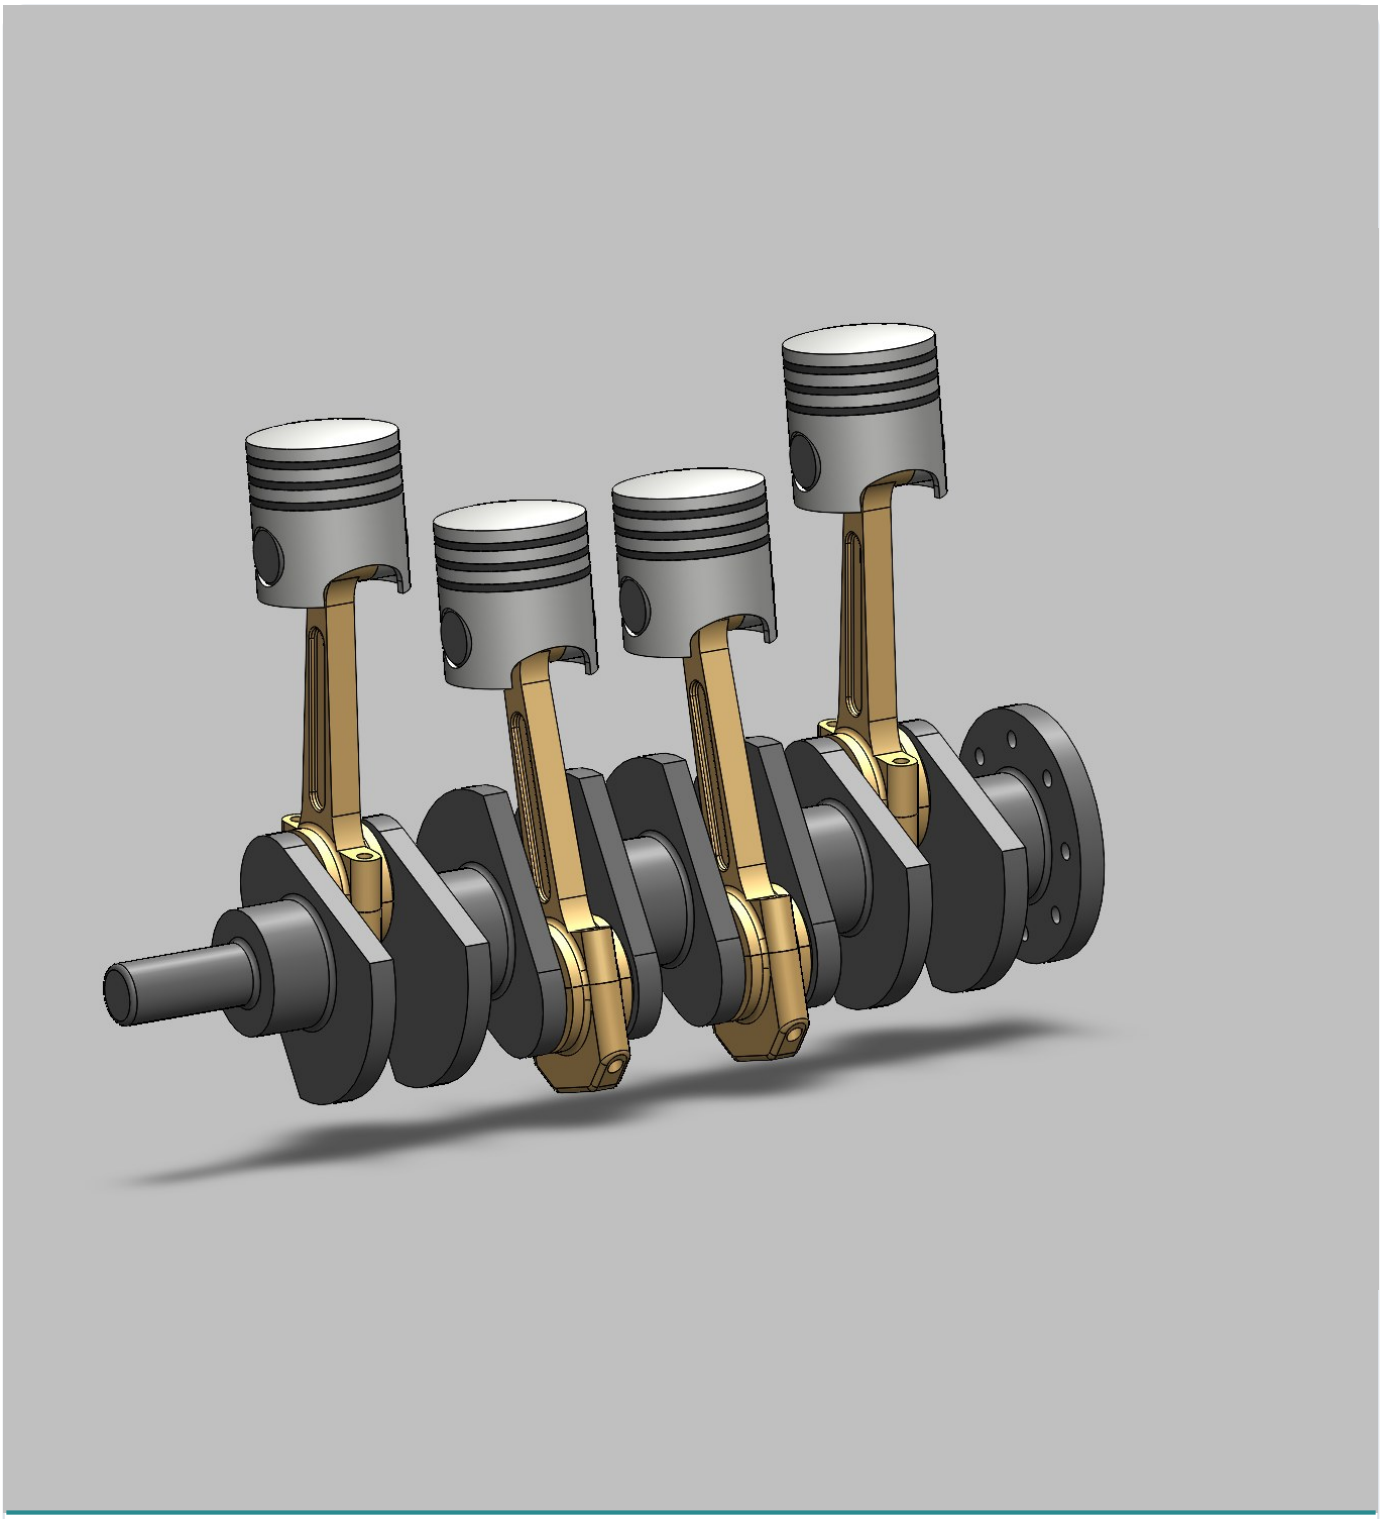

B Sheet Metal Drawing — Page 5

C Kitchen Layouts, AutoCAD — Pages 6 - 8

D MEP Coordination, AutoCAD — Page 9

3D Modeling - SolidWorks

Part and assembly models built for fit, form and function checks

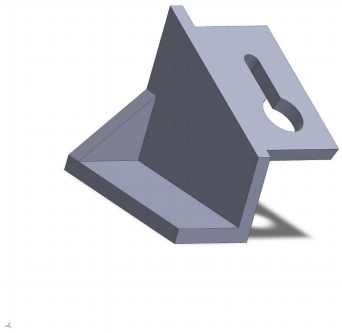

4-Cylinder Piston & Crankshaft Assembly

Four pistons, connecting rods and a crankshaft modeled as one assembly.

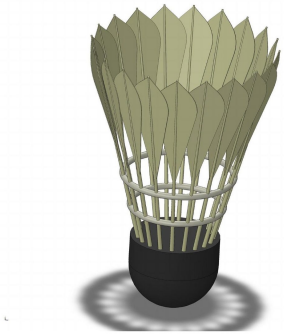

3D Modeling - SolidWorks

Part and assembly models built for fit, form and function checks

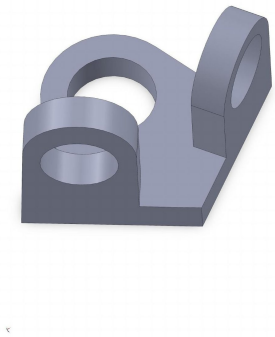

Mounting Bracket

Sheet-metal angle bracket with slotted mounting hole, modeled for fit and manufacturability.

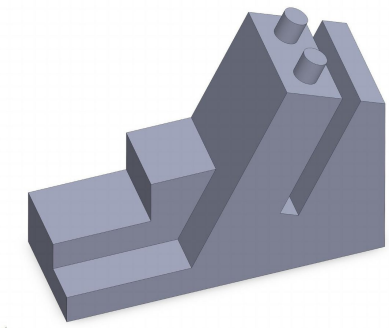

Product Surface Model

Complex multi-surface model built to capture organic curvature and assembly detail.

Pillow Block / Flange Bracket

Twin-bore support bracket modeled with counterbore detailing for shaft mounting.

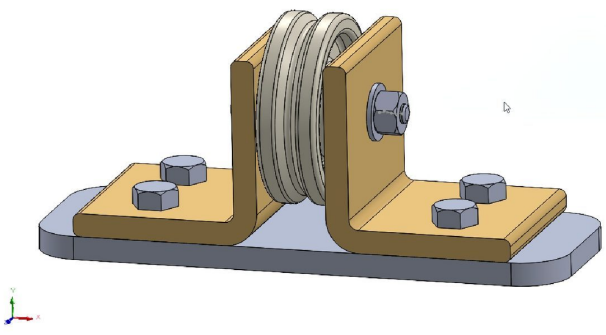

Stepped Base Block

Stepped mechanical block with dowel locating pins and a milled keyway slot.

Bottle - Industrial Design Model

Contoured bottle geometry with applied label graphic, modeled surface-to-solid.

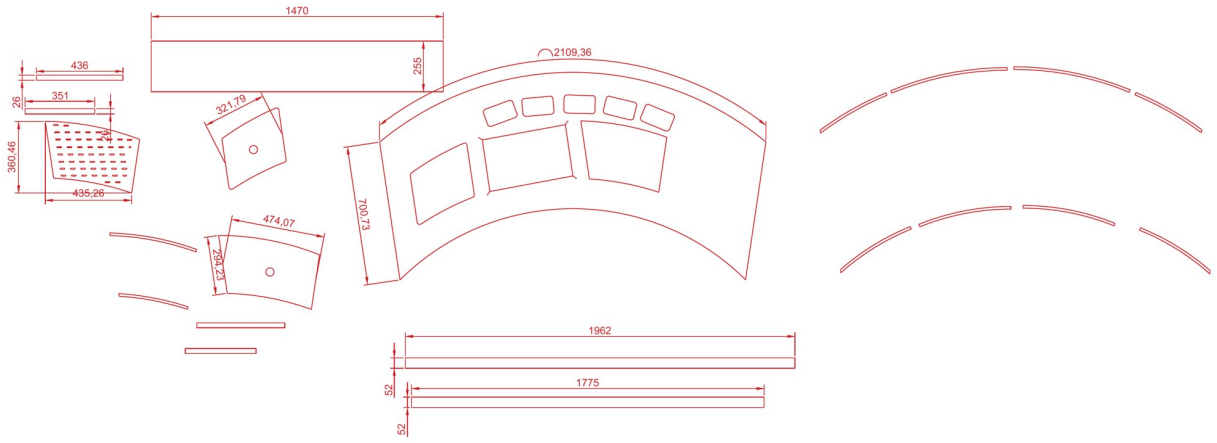

Pulley Mount Assembly

Bolted V-groove pulley assembly on an angle-bracket base, modeled with fasteners.

Sheet Metal Drawing

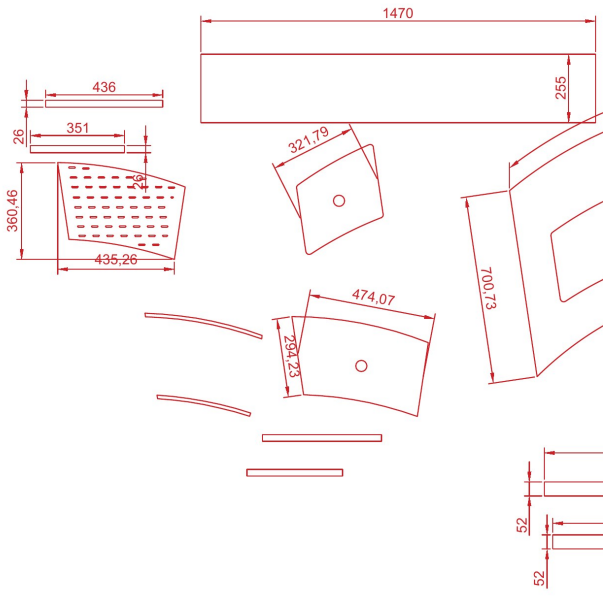

Flat-pattern drawing with dimensioned panels, cut-outs and perforations

Round Bar Counter - Flat Patterns

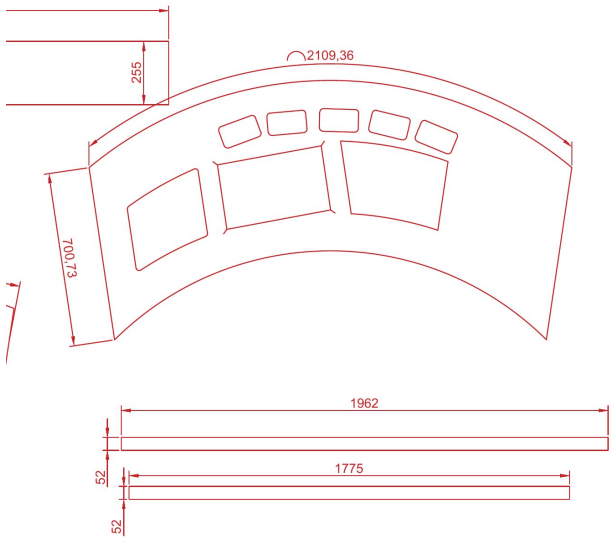

Dimensioned flat-pattern drawing of a curved bar counter, with panels, cut-outs and a perforated section.

Detail views

Small panels and strips

Perforated panel, small plates and the 1470 x 255 strip.

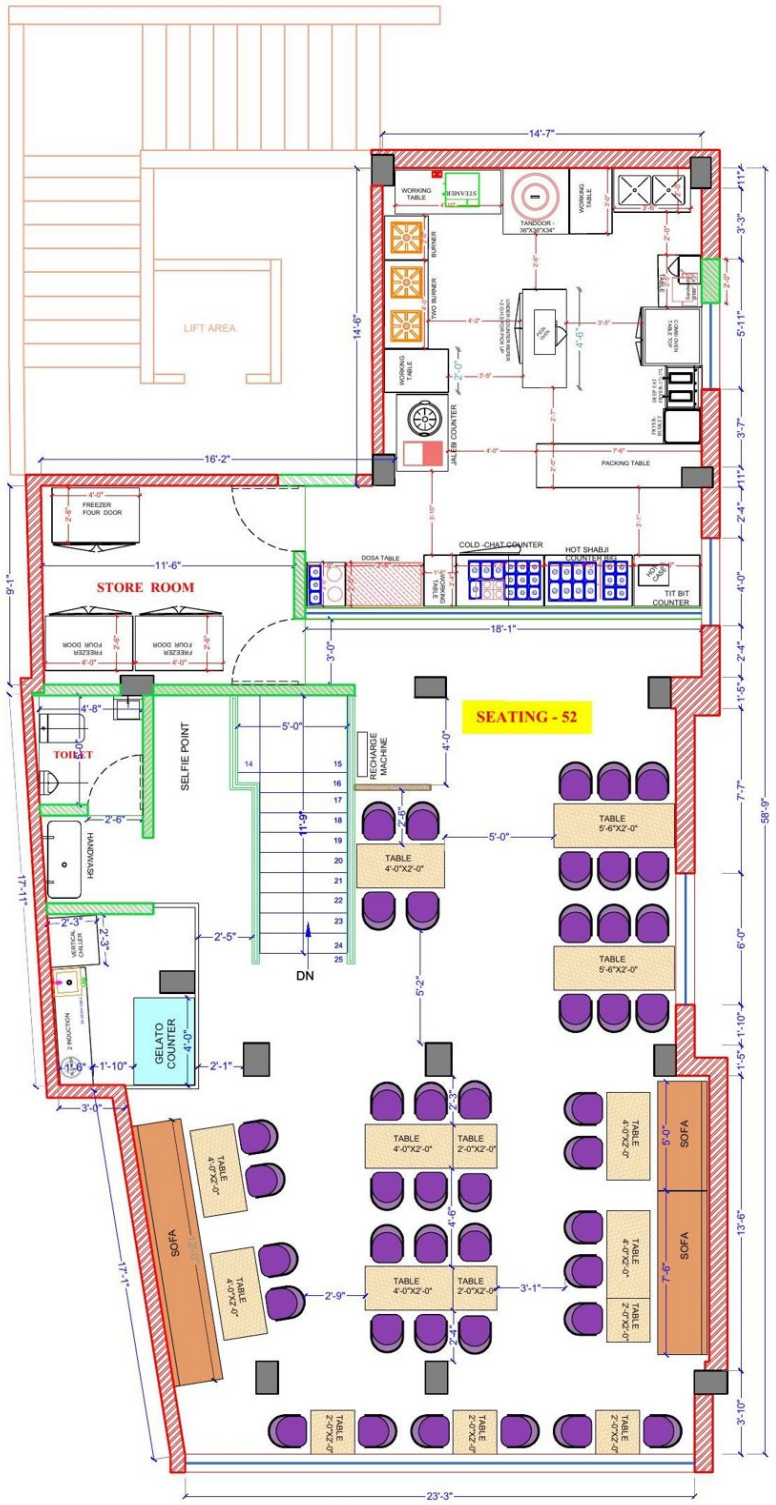

Main curved panel

Curved top panel with five cut-outs, arc length 2109.36.

QSR Kitchen & Seating Layout

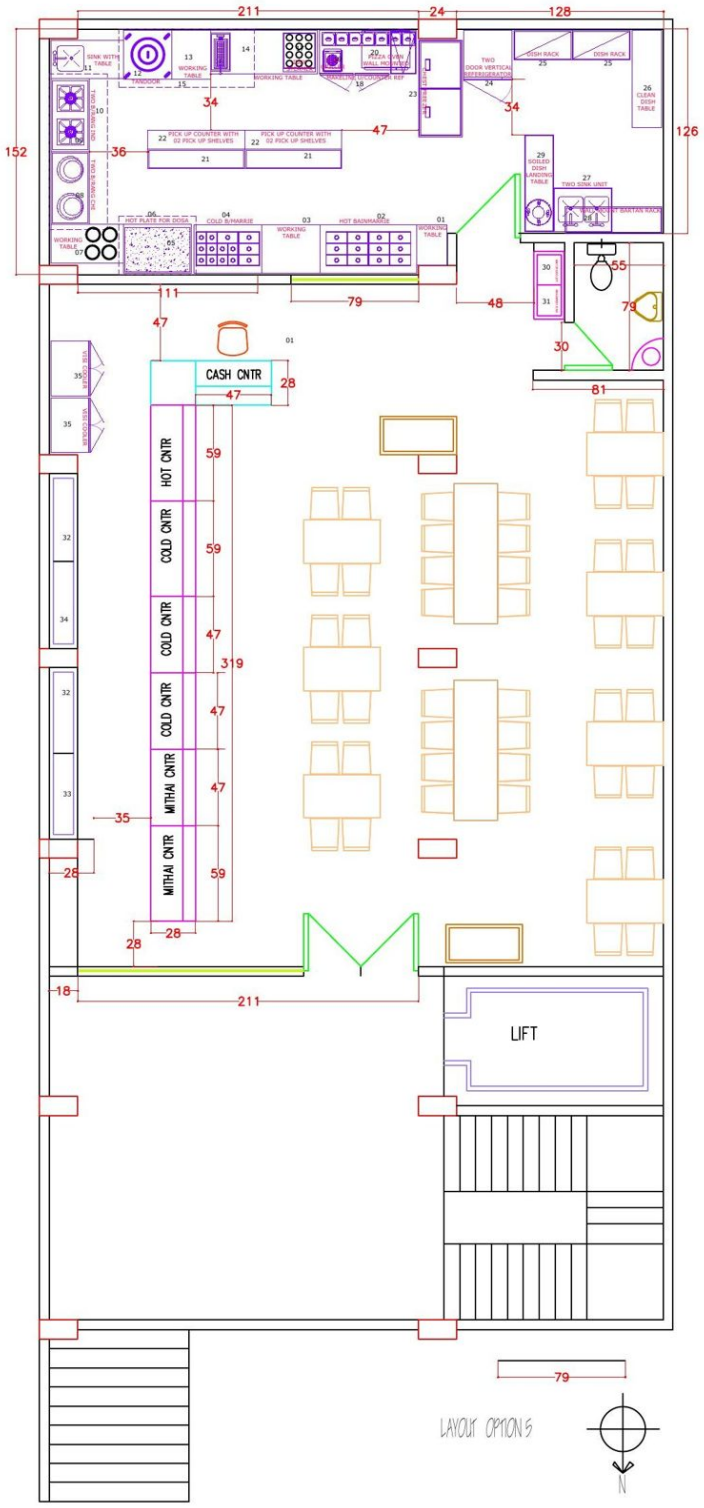

Full floor layout with kitchen equipment, seating for 52, and dimensioned circulation

Full Floor Plan | Seating - 52 | Dimensioned Circulation

Kitchen Layout - Option 5

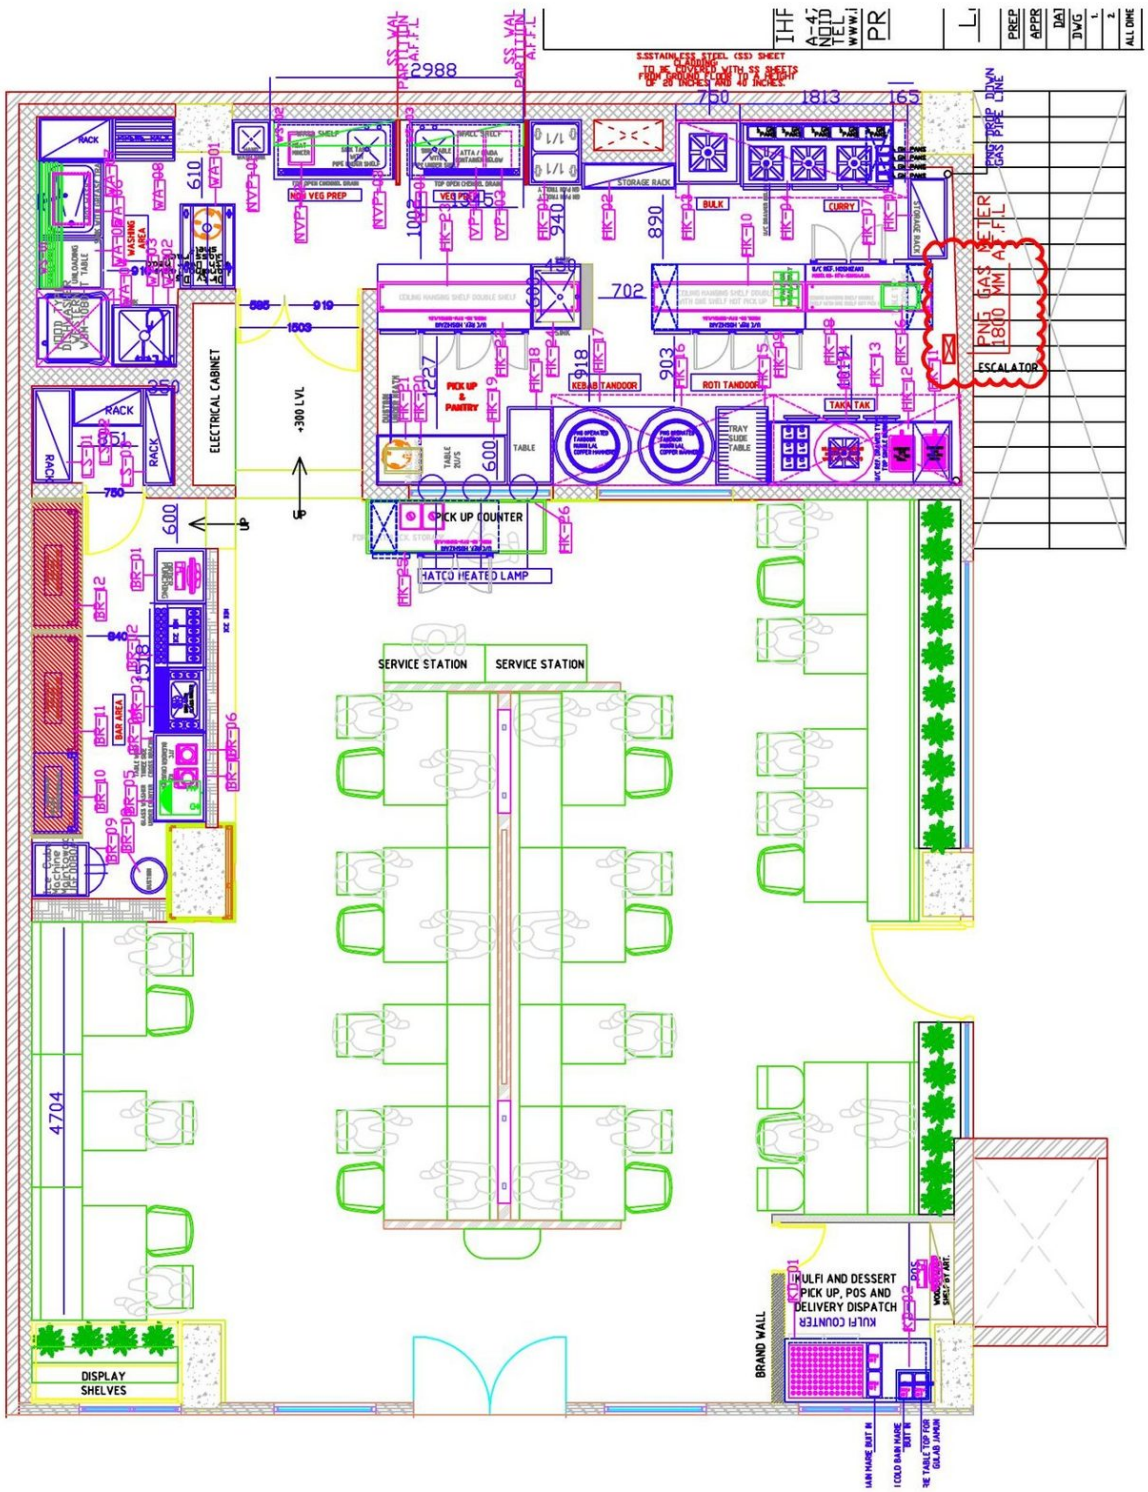

Counter and cold-storage arrangement with dish-wash zone and dining floor plan

Counter Layout | Cold Storage Zoning | Dining Floor Plan

Full Kitchen Layout with Equipment Schedule

Complete back-of-house layout with tagged equipment schedule and utility routing

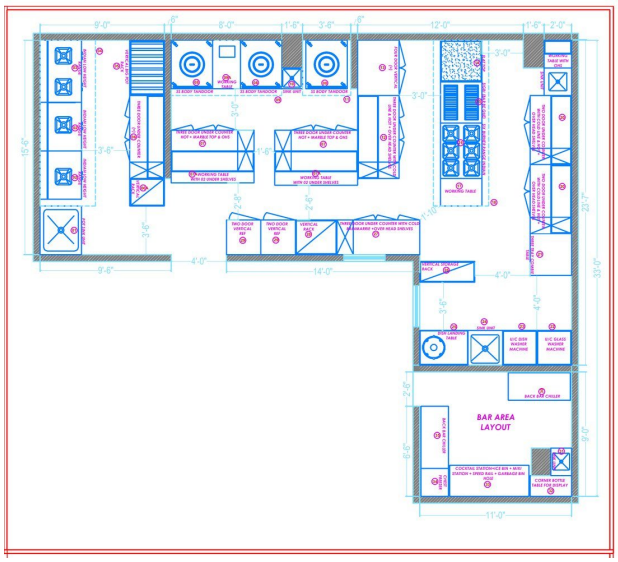

Back-of-House Layout | Tagged Equipment Schedule | Utility Routing

Bar Area - MEP Layout

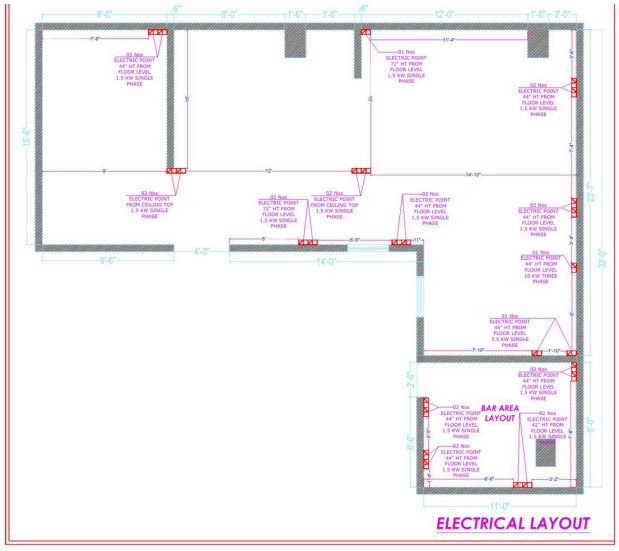

Ducting, equipment, electrical and plumbing layouts coordinated for a bar-area build-out

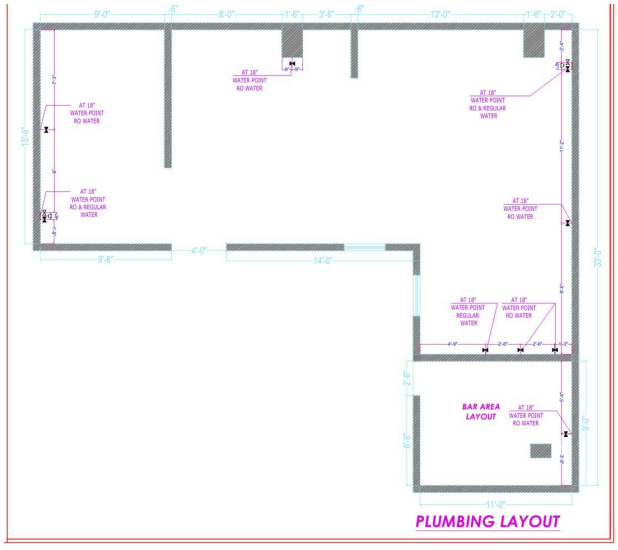

Ducting Layout

Bar Equipment Layout

Electrical Layout

Plumbing Layout
